

DC 135 rape cutter: an easy means of increasing your yield

Simplify harvesting thanks to easy-to-use equipment which will rapidly become profitable

→ Guaranteed robustness

→ The design of this tool has left nothing to chance

- Perfectly balanced movement thanks to 2 mobile blades and 2 symmetric rods
- Mechanical maintenance-free gear motor
- The blades slide over pads which are specially designed to reduce friction and mechanical restrictions
- Positioned over the crops, the engine is protected from external hazards (dust, friction, impact, etc.)
- 1-year manufacturer warranty

→ Quick to fit on all reapers

- Easy connections using electrical cables
- Blade can be fitted right or left simply by turning the gear motor round

Technical characteristics:

BLADES

2 mobile blades

Length: 1.35 m

Blade cover provided for use in transport

TWO MOTOR OPTIONS

12 or 24 volts - 350 W

1 life-long lubricated mechanical gear motor

Reversible left/right motor position

TOTAL WEIGHT

28 kg

→ A powerful mechanism ensuring maximum effectiveness

→ Improve your yield!

- Thanks to the length of the blades (1.35 m), you will improve the volume of grains recovered while continuing at a reasonable forward speed, including for new high-yield canola varieties
- Benefit from the right power: 12 or 24 volt electrical motor
- Optimal forward speed: 570 oscillations per minute for complete cutting without gears

Tested and approved robustness: the DC 135 is able to operate without interruption for 2500 hours without losing power!

Reversible left/right motor
